# CMM 378 Research Methods in Linguistics

#### MODULE HANDBOOK

**Module title:** Research Methods in Linguistics

Module Code: CMM378 CRN: 87414 Credit points: 20 credits

**Module Co-ordinator:** Dr Juliana Gerard (<u>j.gerard@ulster.ac.uk</u>)

Office hours: calendly.com/julianagerard/meeting

**Hours per week:** 2hr lecture

1hr seminar (*starting week 2*)

Independent study, assignment preparation and directed

reading (including assessment)

When: Lecture on Wednesday at 12:15

Seminar on Wednesday either 10:15 or 11: 15

Where: Lecture and Seminar on Blackboard Collaborate

### Why am I studying this module?

This module will cover the steps involved in carrying out experiments based on theoretical issues in linguistics. The first half of the module will focus on the fundamentals of experimental design and statistical analyses, while the second half will introduce various methods for conducting research in linguistics.

### What am I going to learn on this module?

#### Tentative schedule

Week 1:

Introduction, variables and causality

Week 2:

Types of designs, sampling, ethics

Week 3:

Survey methods for grammaticality judgments

Week 4:

Describing quantitative data

Week 5:

Hypothesis testing and statistical tests

Week 6:

Reading week

Week 7

Employability & Careers guest lecture

Week 8:

Overview of methods in linguistics

Week 9

Corpus methods 1

Week 10:

Corpus methods 2

Week 11:

Referencing

Week 12:

Final project review

#### What should I be able to do by the end of this module?

By the end you should be able to:

- Identify and evaluate the predictions of competing hypotheses
- Summarize the trends in a dataset and conduct basic statistical analyses
- Design an experiment using the methodologies covered in the module.
- Summarise relevant literature and write a concise structured review of pertinent issues.

## How am I going to learn on this module?

You have a **two hour class** during which the material will be presented by the lecturer, followed by a **weekly one hour seminar** (starting week 2) for discussing questions about assignments and reviewing course material. Attendance and participation in both the lectures and seminars is important, and will count towards the final grade. Questions may also be posted in the online discussion board before class, and will still count towards participation.

The lecture will cover various concepts related to experimental design and methodology in linguistics. The seminar will focus more on the practice exercises, but will also provide more of an opportunity to cover any questions about new material.

## How am I going to be assessed on this module?

- Coursework exercises: 30%
- Reference list (due Friday week 12): 10%
- Project proposal (due Friday exams week 2): 50%
- Participation in group activities: 10%

#### What should I read for this module?

## Required reading:

- Rasinger, S. M. (2013). Quantitative research in linguistics: An introduction (2<sup>nd</sup> edition). Bloomsbury.
- Crain, S., & Thornton, R. (2000). *Investigations in universal grammar: A guide to experiments on the acquisition of syntax and semantics.* MIT Press.
- Wray, A., & Bloomer, A. (2012). *Projects in Linguistics and Language Studies*. Routledge.

#### Recommended reading:

- Baayen, R. H. (2008). *Analyzing Linguistic Data: A Practical Introduction to Statistics using R*. Cambridge University Press.
- Johnson, K. (2008). Quantitative methods in linguistics. Malden, MA: Blackwell Pub.
- Gries, S. T. (2009). *Statistics for Linguistics with R: A Practical Introduction*. Walter de Gruyter.
